RNA panel expression and respiration diverge across two donor culture series
125-gene panel expression
Measured respiratory capacity
Raw association: ρ = -0.627
Linear time residuals: r = -0.281
HC1 · 11 paired records
Panel mean (source log2 VST)
Spare capacity
(pmol O₂/min/20,000 cells)
Days in culture
Panel mean (source log2 VST)
Spare-capacity residual
Panel-expression residual
125-gene panel expression
Measured respiratory capacity
Raw association: ρ = 0.552
Linear time residuals: r = 0.148
HC2 · 10 paired records
RNA only
Days in culture
Panel mean (source log2 VST)
Panel-expression residual
Days in culture
Sturm et al. (2022) source cultures · Saul et al. (2022) human SenMayo genes
Heuristic panel mean; two 18-year-old donors; descriptive observations of untreated culture aging.
